TABLE OF CONTENTS

		PAGE
Double fertilization and development of the seed in angiosperms (with nine figures)	*R. A. Brink and D. C. Cooper*	1
New Lepidostrobi from central United States (with seven figures)	*G. B. Mathews*	26
Peptidase activity in the *Avena* coleoptile. Phytohormone test object (with nine figures)	*George S. Avery, Jr., and K. Linderstrøm-Lang*	50
Agglutination test applied to strains of *Phytomonas stewarti*	*George L. McNew and Armin C. Braun*	64
Agglutinin absorption by different strains of *Phytomonas stewarti*	*Armin C. Braun and George L. McNew*	78
Nitrogen metabolism of the plant embryo (with four figures)	*W. L. McRary*	89
Starch hydrolysis in bean leaves following spraying with alpha naphthaleneacetic acid emulsion (with four figures)	*John W. Mitchell, E. J. Kraus, and Muriel R. Whitehead*	97
Evolutionary significance of ring porosity in woody angiosperms (with twelve figures)	*S. G. Gilbert*	105
Response of the peanut plant to inoculation with rhizobia, with special reference to morphological development of the nodules (with eleven figures)	*O. N. Allen and Ethel K. Allen*	121
Chromosome catenation in *Oenothera* (with twenty-five figures)	*K. T. Jacob*	143
Effects of vitamin B_1 upon the development of some flowering plants (with four figures)	*Charles L. Hamner*	156
Responses of *Marchantia polymorpha* to nutrient supply and photoperiod (with fourteen figures)	*Paul D. Voth and Karl C. Hamner*	169
Chemical and histological responses of bean plants grown at different levels of nutrition to indoleacetic acid (with eleven figures)	*Ora Smith, L. B. Nash, and G. E. Davis*	206
Method for covering emasculated flowers in plant breeding (with four figures)	*J. R. King*	217
Uses of the Feulgen reaction in cytology. II. New techniques and special applications (with three plates)	*B. B. Hillary*	225
Studies of chromosomal association and behavior and occurrence of aneuploidy in autotetraploid grass species, orchard		

40486

		PAGE
grass, tall oat grass, and crested wheatgrass (with three figures)	*W. M. Myers and Helen D. Hill*	236
Floral initiation in Biloxi soybeans as influenced by photosynthetic activity during the induction period (with one figure)	*M. W. Parker and H. A. Borthwick*	256
Length of day and temperature effects in *Rudbeckia* (with eleven figures)	*A. E. Murneek*	269
Parthenocarpic and normal fruits compared as to percentage of setting and size (with one figure)	*Felix G. Gustafson*	280
Polyploid cottons obtained through use of colchicine. I. Cytological observations in octoploid *Gossypium hirsutum* (with twenty figures)	*A. J. T. Mendes*	287
Formation of the seed of *Cypripedium parviflorum* (with nine figures)	*Margery C. Carlson*	295
Effect of light and temperature on floral initiation in cocklebur and Biloxi soybean (with five figures)	*William E. Snyder*	302
Effect of growth substances on the absciss layer in leaves of *Coleus* (with nine figures)	*R. Maurice Myers*	323
Effect of some environmental factors on floral initiation in *Xanthium* (with five figures)	*Louis K. Mann*	339
Effect of bile salts and oleates on the structural viscosity of protoplasm (with three figures)	*Robert M. Muir*	357
Effect of indoleacetic acid on thin sections and detached segments of the second internode of the bean (with two figures)	*J. M. Beal*	366
Histological responses of bean plants to tetrahydrofurfuryl butyrate (with seven figures)	*Wendell R. Mullison*	373
Nitrogen content of sound and decayed coniferous woods and its relation to loss in weight during decay	*R. E. Hungate*	382
Starch hydrolysis in bean leaves as affected by application of growth-regulating substances (with one figure)	*John W. Mitchell and Muriel R. Whitehead*	393
Ontogeny of medullary bundles in *Apium graveolens* (with twelve figures)	*Edith C. Lambeth*	400
Absorption spectra of the carotenoids in the red and brown forms of a photosynthetic bacterium (with one figure)	*C. S. French*	406
Desmids of Mirror Lake, Utah	*Edna Snow*	410
Biochemical nitrogen fixation studies. III. Production and oxidation of ethyl alcohol by legume nodules (with one figure)	*C. A. Ludwig, Franklin E. Allison, Sam R. Hoover, and Francis W. Minor*	417
Anatomical and physiological responses of the tomato to varying concentrations of sodium chloride, sodium sulphate, and nutrient solutions (with ten figures)	*H. E. Hayward and E. M. Long*	437

		PAGE
Influence of preparative procedure on the purity of chlorophyll components as shown by absorption spectra (with four figures)	*F. P. Zscheile and C. L. Comar*	463
Oogenesis and fertilization in *Pinus lambertiana* and *P. monophylla* (with twenty-six figures)	*Arthur W. Haupt*	482
Growth and development in range grasses. I. Early development of *Bouteloua curtipendula* in relation to water supply (with one figure)	*Charles E. Olmsted*	490
Further observations on factor Z (with four figures)	*William J. Robbins*	520
Influence of sulphur deficiency on metabolism of the sunflower (with one figure)	*Scott V. Eaton*	536
Effects of some environmental factors on photoperiodic induction of beet and dill (with six figures)	*Aubrey W. Naylor*	557
Effects of root-growth hormones on the meristem of excised pea roots (with six figures)	*Frederick T. Addicott*	576
Growth of some range grasses in reduced light intensities at Cheyenne, Wyoming (with four figures)	*H. M. Benedict*	582
Use of frozen vacuum-dried material in auxin and other chemical analyses of plant organs: its extraction with dry ether (with one figure)	*George K. K. Link, Virginia Eggers, and James E. Moulton*	590
Histological reactions of bean plants to l-tryptophane (with fifteen figures)	*E. J. Kraus*	602
Antherozoids of some of the Characeae (with six figures)	*W. N. Steil*	623
Mechanism of mitosis in pollen tubes (with ten figures)	*Karl Sax and J. G. O'Mara*	629
Life history of *Peltandra virginica* (with forty-nine figures)	*Benjamin Goldberg*	641
Coal flora studies: Lepidodendrales (with thirty-five figures)	*Fredda D. Reed*	663
Development of seedlings of *Heteropogon contortus* as related to soil moisture and competition (with four figures)	*George E. Glendening*	684
Megagametophyte development in a triploid tulip (with forty-three figures)	*John M. Bellows, Jr., and Ronald Bamford*	699
Effect of concentration of oxygen and pressure of water upon growth of rhizomes of semi-submerged water plants (with six figures)	*Harlow E. Laing*	712
Phasic development of Marquis spring wheat and Fulhio winter wheat (with two figures)	*D. J. Wort*	725
Responses of sunflower stems to growth-promoting substances (with ten figures)	*John L. Blum*	737
Floral anatomy and morphology of *Anemopsis californica* (with thirty-eight figures)	*Charles H. Quibell*	749
Reinvestigation of polysomaty in *Spinacia* (with eighteen figures)	*Charles A. Berger*	759

PAGE

Responses of vegetative parts of plants following application of extract of pollen from *Zea mays* (with twelve figures) - *John W. Mitchell and Muriel R. Whitehead* 770

Influence of localized low temperature on Biloxi soybean during photoperiodic induction (with two figures) - - - *H. A. Borthwick, M. W. Parker, and P. H. Heinze* 792

Effectiveness of tryptophane mixtures as growth regulators (with two figures) - - - - - - - - - - - *William S. Stewart* 801

Megasporogenesis and development of the megagametophyte in *Nothoscordum bivalve* (with nine figures) - - - - *Mary Louise Eckles* 806

Cytological studies in relation to the classification of the genus *Calochortus*. II (with three figures) - - - - - - *J. M. Beal* 810

Water content and osmotic pressure of sun and shade leaves of certain woody prairie plants - - - - - - - *Frank L. Marsh* 812

Briefer Article—

Method for softening filbert buds imbedded in paraffin - *C. E. Schuster* 815

Current Literature - - - - - - - - - - - - 221, 412, 637, 818
